Terms and Conditions

Prior to undertaking any work the homeowner/landlord will receive a written quotation setting out the scope of the insulation work, including any additional charges. Any work will only be started when a written acceptance of the offer has been received by the installer.

*The £340 saving over a one year period is made up from increasing your loft insulation from 50mm (about 2 inches) to between 250mm and 270mm (about 10 – 11 inches) and installing cavity wall insulation. The cost saving is approximate, is provided for illustrative purposes only and is based on a 1940's gas heated semi-detached house with three bedrooms. Savings assume a gas price of 3.158p/kWh using a 10 year old gas boiler. Your individual saving will vary according to the type and age of your home, the type and age of your boiler, the fuels you use in your home and whether or not you choose to take increased warmth following the installation of the insulation measures.

† Insulation is free if you, or someone living with you, is aged 70 or over, or in receipt of a qualifying benefit. Additional charges may apply if a property is larger than the average size for the property type, or if vents or scaffolding are required. Based on a typical three bedroom semi-detached house with no more than 100mm of existing loft insulation. Other Terms and Conditions apply and will be set out in the contract with the appointed installer. Offer is subject to availability and may be withdrawn at anytime.

E.ON Energy Limited

Registered Office: Westwood Way, Westwood Business Park, Coventry CV4 8LG.

Registered in England and Wales No. 3407430.

Here's a simple guide to help you check if your home is eligible for home insulation.

Cavity wall insulation - things to check

If you answer **'yes'** to the questions below then you are probably not eligible for cavity wall insulation.

Are your outside walls less than 260mm (10 inches) thick?

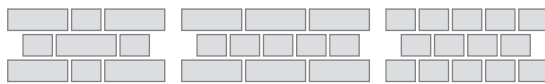

The best way to check is by looking at the outside door frame.

Yes No

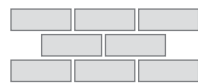

Are any of the bricks in your outside walls end on, rather than lengthways?

Yes No

End on bricks

Lengthways bricks

Was your home built before 1930?

Yes No

Was your home built after 1995?

Yes No
